

Single Burner Wood Stove

Saves Money

With up to 50% fuel savings, a family of 5 people saves 2 kg of wood per day. The cost of the stove is recovered within 6 months, and with di-annual maintenance, the stove has an expected lifetime of 5 years.

Saves Time

Less time is needed to collect or purchase fuel and build a fire.

Improves Health

With up to 80% of dangerous smoke and indoor air pollution reduced, the risk of health problems is dramatically reduced. Children and women are also less at risk from burns.

Greens the Planet

Deforestation and as a result, soil erosion, climate change, landslides and flooding are reduced.

Empowers Women

With their domestic burden dramatically reduced, women and young girls have a greater chance of acquiring education and gaining employment.

Made in India

Manufactured in Chennai with a high quality to cost ratio and a 1 year warranty. Design transfer to local communities to create economic empowerment.

Tested to Perfection

Tested for performance, acceptability, and durability by in-house cooks, end users and our professional testing unit, our stoves are responsive to the needs of targeted users.

High quality, easy to clean, and durable finish.

Combustion chamber protected with a custom designed metal plate
